Schedule Color Changes

Based on customer feedback after the launch of Sunrise, we updated the My Schedule colors for both Online and iPad to better differentiate the Call states. We made the decision to push these changes during a patch because quickly identifying Calls is an important part of the users' interaction with Veeva CRM.

The following is information you can share about the color changes. You can also view the color changes in this [video](#).

- Shades of teal/green show progression through the statuses
 - Light teal - planned
 - Dark teal - saved
 - Green – submitted
- Red indicates past calls - prominently highlighted
- White pattern aids in identifying planned calls easily

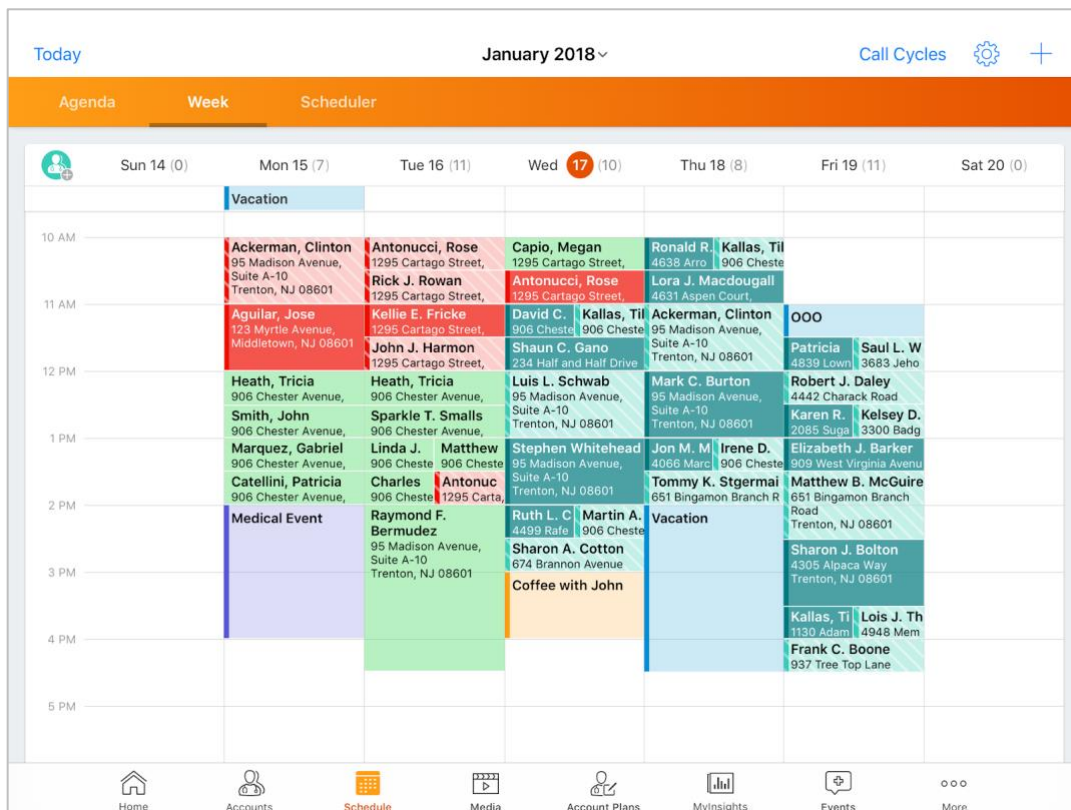

Figure 1: Weekly Calendar Schedule Colors

Note: When using Shared Calendars in the Online platform, events from those shared calendars display with a black border to make visible what events are the current users and what events are from the shared calendar.
